Projects

Society Management System:

- Designed a web-based Society Management System to facilitate the management of residential societies, enhancing communication and operational efficiency.
- Implemented user authentication and role-based access control, ensuring secure access for both administrators and residents.
- Designed and developed features for event management, complaint handling, user management, and maintenance billing using PHP and MySQL.

Personal Portfolio Website

- Created a personal portfolio website using HTML, CSS, and JavaScript to showcase my web development projects and skills to potential employers.
- Key Features: Responsive design, Interactive project showcase, contact form
- Technologies: HTML, CSS, JavaScript.

Real-Time Chat Application

- Built a real-time chat application primarily using JavaScript and jQuery to enhance front-end interactivity. Implemented dynamic message rendering and user interface updates using jQuery's DOM manipulation capabilities. Used AJAX to communicate with a PHP back-end for message storage and retrieval.
